Discussion

Building 879 was demolished in January 2005. Portions of the slab were inaccessible during the PDS of the building. In the RFCA Contact Record that allowed demolition to proceed, and in PDSR CDPHE concurrence letter dated January 26, 2005, it stated that a characterization survey of the inaccessible portions of the slab shall be performed during demolition of the building. This characterization was performed and the survey results were provided to DOE and CDPHE on February 7th, 2005. Based on a review of these survey results (radiological and beryllium surveys), the demolition of the 879 Slab can proceed. These survey results will be included in the Closeout report for Building 879.
